Find Your People!

Where Education and Entertainment Meet

About :

Dental Research Club (DRC) is an extracurricular initiative under the Research Unit at the College of Dentistry-KSAUHS which focuses on overall students' understanding and contribution to the dental research field.

Mission :

The DRC's mission is to enrich the culture of Scientific Research at the College of Dentistry- KSAUHS by cultivating a community of researchers and providing opportunities for education, collaboration, and innovation in dental research.

Vision :

To be recognized for our commitment to knowledge, innovation, and collaboration in dental research.

Goals:

- To provide a unique research environment, by engaging students and faculty members.
- To create a research community among students and faculty members.
- To expand COD students' research knowledge and skills through different educational and entertainment activities.
- To facilitate reaching the new updates in research.
- To promote COD research.

Why join DRC?

- Boost confidence in your capabilities as a researcher by developing your research skills and expanding your research knowledge
- Establish a relationship and work closely with a faculty member, a research mentor, and a fellow student.
- Gain a deeper understanding and knowledge of your academic field.
- Acquire skills in communication, critical thinking, problem-solving, teamwork, leadership, and time management.
- Expand your learning outside of the classroom and apply them to real-life situations.

What does DRC provide?

- Networking opportunities
- Access to resources
- Continuing education
- Professional development
- Entertainment activities

And many more events to come along the year!

Join us!

Together we shall make the field thrive
